ABET Related Forms (Fall 2020)
RE: Alumni Assessment of Ocean Engineering Program Objectives and Outcomes

Dear Sir / Madam:

Our undergraduate Ocean Engineering program in the Department of Ocean & Mechanical Engineering at Florida Atlantic University is undergoing a periodic review to determine how well we are meeting our established program objectives and achieving expected student outcomes. As part of this evaluation, we are once again seeking input from our alumni associated with the program and we would be grateful if you could assist us in this process. As someone who have graduated from our program, you have perhaps the best vantage point to our BSOE program and hence to provide us with valuable information for program improvement.

Attached, you will find three forms: (1) Alumni Assessment of Program Objectives; (2) Alumni Assessment of Student Outcomes, and (3) Alumni Information Update. The information that you will provide on these forms will be carefully studied by the faculty and staff of the department and meaningful steps will be taken for program improvement. Naturally, program improvement based on the feedback from our alumni is important for the program recognition and accreditation by ABET (Accreditation Board for Engineering and Technology).

Please complete the attached employer surveys on program objectives and outcomes at your earliest convenience and return them to

Dr. Edgar An,
Boca Raton Campus
Department of Ocean & Mechanical Engineering
Florida Atlantic University
777 Glades Road, Boca Raton, FL 33431

or email them to pan@fau.edu. Please contact Dr. An, who chairs our undergraduate program assessment and improvement committee, by email (pan@fau.edu) if you have questions or need clarifications on the survey and/or on the program objectives and outcomes. Details of our program can be found at http://www.ome.fau.edu/ocean-engineering/undergraduate.

Sincerely,

Edgar An, Professor
Associate Chair, Ocean & Mechanical Engineering

Encls: Survey forms on FAU-BSOE program objectives and outcomes, and information update.
1. Alumni Survey on the BSOE Program Objectives

Using a scale ranging from 1 to 10, with 1 meaning poor, 7 satisfactory and 10 excellent, please assess how well the BSOE program at FAU achieves its stated program objectives. If unable to rank any objective, you may leave that blank. Please return the completed form to pan@fau.edu. Thanks.

Any Additional Information or Comments on the BSOE Program at FAU:
EMPLOYER SURVEY ON BSOE PROGRAM OBJECTIVES AND OUTCOMES

Dear Sir/Madam:

Our undergraduate Ocean Engineering program in the Department of Ocean & Mechanical Engineering at Florida Atlantic University is undergoing a periodic review to determine how well we are meeting our established program objectives and achieving expected student outcomes. As part of this evaluation, we are once again seeking input from industry, alumni and others associated with the program and we would be grateful if you could assist us in this process. As an employer (or a supervisor) of our OE graduates, your assessment of the program based on your knowledge of our graduates and their performance in your company is highly valued and is used for continuous improvement of the program. Please complete the attached employer surveys on program objectives and outcomes at your earliest convenience and return them to

Dr. Edgar An,
Boca Raton Campus
Department of Ocean & Mechanical Engineering
Florida Atlantic University
777 Glades Road, Boca Raton, FL 33431

or email them to pan@fau.edu. Please contact Dr. An, who chairs our undergraduate program assessment and improvement committee, by email (pan@fau.edu) if you have questions or need clarifications on the survey and/or on the program objectives and outcomes. Details of our program can be found at http://www.ome.fau.edu/ocean-engineering/undergraduate.

If you find that our graduates are spread throughout various divisions of your firm, necessitating the assessment by individual division heads or supervisors, please have the division heads/ supervisors complete the survey form and return them to us at the above address.

We thank you for your valuable time and input and send our best regards to you and your colleagues.

Yours truly,

Edgar An, Professor
Associate Chair, Ocean & Mechanical Engineering
pan@fau.edu
Encls: Department Mission/Goal/Objectives/Outcomes Statements; Course List; 2 Survey Forms

Department of Ocean & Mechanical Engineering
Florida Atlantic University

Mission: The mission of the Ocean Engineering Program is to provide an outstanding ocean engineering program for learning and research and to prepare individuals to meet national and international engineering challenges in the ocean environment.

Undergraduate Program Goal: The goal of the Ocean Engineering Program is to develop and offer a comprehensive and broad curriculum in science and engineering that prepares a student, upon graduation, to efficiently perform engineering tasks in the ocean environment or to successfully pursue higher studies and research in engineering.

Undergraduate Program Objectives:
Graduates of the ocean engineering baccalaureate program at the Florida Atlantic University, within a few years after graduation, will:
1. Demonstrate an ability to carry out engineering tasks in the multi-disciplinary field of ocean engineering.
2. Make meaningful contributions in terms of design, development and integration of engineering systems, particularly for applications in the ocean environment.
3. Pursue further study for the graduate degree and / or participate in professional societies.
4. Develop and exhibit leadership qualities in their engineering work.
5. Understand various complexities and issues of the contemporary society and make professional contributions in the larger and long-term interest of the society.

Expected Undergraduate Student Outcomes
The program will meet the above objectives by establishing the following educational outcomes for student performance. At the time of graduation, the students will attain the following:

(1) an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

(2) an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

(3) an ability to communicate effectively with a range of audiences

(4) an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

(5) an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

(6) an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

(7) an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
Department of Ocean & Mechanical Engineering
Florida Atlantic University
Bachelor of Science in Ocean Engineering (BSOE) List of Courses

Letters, Arts, Humanities, Social Sciences
(24 credits)
English I & II, Appreciation of Music, Theater etc, Economics, History, Geography, Introduction to Philosophy, History of Civilization, etc.

Mathematics:
(15 credits)
Calculus I, II, III
Engineering Mathematics 1

Sciences:
(15 credits)
Physics I, II with Lab
Chemistry I with Lab, Oceanography

Computers
(6 credits)
Introduction to C Programming
Computer Applications in Engineering 1

Electrical
(6 credits)
Circuits, Introduction to Electronics & Programming

Basic Engineering
(6 credits)
Fundamentals of Engineering, Engineering Graphics

Junior Year:
(44 credits)
Statics, Dynamics, OE Lab
Thermodynamics
OE Fluid Mechanics (w/ buoyancy & stability)
Strength of Materials
Engineering Materials I
Vibrations, Acoustics for Ocean Engineers
Structural Analysis
Ocean Thermal Systems
Fabrication of OE Systems
Dynamic Systems
Finite Element Analysis**
Innovative Sensing and Actuation Technology**
Computer Applications in ME 2

Senior Year:
(20 credits)
Marine Topics
Ocean Wave Mechanics
Ocean & Environmental Data Analysis
Ship Hydrodynamics*
Marine Materials and Corrosion*
Underwater Acoustics*
Ocean Structures*
Senior Design I & II

** Junior Electives (1 out of 2 Courses)
* Senior Electives (2 out of 4 Courses)

Total required credits for the degree = 136
1. Employer Survey on the BSOE Program Objectives

The following objective statements for the Ocean Engineering Undergraduate Program were developed by the faculty members of the Department and the College of Engineering and Computer Science. For each objective, please rate its appropriateness using a scale ranging from 1 to 10, with 1 meaning poor, 7 satisfactory and 10 excellent, and assess how well the BSOE program at FAU achieves its stated program objectives. If unable to rank any objective, you may leave that evaluation blank. You may include additional comments on a separate page. Thank you!

2. Employer Survey on the BSOE Program Student Outcomes

Based on the performance of the graduates of FAU’s Ocean Engineering Undergraduate Program employed in your company, please provide us with your assessment of how well we are achieving our intended undergraduate program outcomes as listed in the following table. Please use a scale ranging from 1 to 10, with 1 meaning poor, 7 satisfactory and 10 excellent. If unable to evaluate any of the outcome(s), you may leave that blank. Thank you.

We greatly value your assessment which will be used to continually monitor and improve the quality of our program. Thank you!

Course Number and Title: EOC 4804 Ocean Engineering Systems Control & Design
Semester Taught: ________________________________
Instructor: ________________________________

Please use this form to rate your personal feelings of achievement of the published outcomes for the course as listed below. The following 0 to 5 rating scale should be used in assessing your achievement of the outcomes. This information will be presented for review to the Department ABET/SACS committee at the end of each semester. The committee will evaluate performance of the specified outcomes by the students and make recommendations for changes as appropriate.

5 - Complete understanding of the technical content of the outcome or the specified skills and a confidence in applying the techniques to engineering problems.

4 - Good understanding of the technical content of the outcome or the specified skills and an ability to apply the techniques to engineering problems.

3 - Adequate understanding of the technical content of the outcome or the specified skills and some ability to apply the techniques to engineering problems.

2 - Marginal understanding of the technical content of the outcome or the specified skills and some difficulty in applying the techniques to engineering problems.

1 - No understanding of the technical content of the outcome or the specified skills.

0 - Did not cover the information specified in the outcome in the class.

Outcome 1: An ability to design a system that satisfies an ocean engineering related need (c/2)

____________________

Outcome 2: An ability to function in multidisciplinary design teams (d/5)

____________________

Outcome 3: An ability to communicate effectively during the progress review meetings and Final Design Review (g/3)

____________________

Outcome 4: An understanding the potential economic, environmental, and societal impacts of ocean engineering designs (h/4)

____________________

Outcome 5: Recognition of the need for self-study and life-long learning in engineering design (i/7)

____________________

Outcome 6: An understanding of how contemporary issues affect engineering design (j/4)
